# SAP S/4HANA
Conversion Methods

Benefit from an intelligent **ERP system** to address the challenges of today and seize the opportunities of tomorrow with flexibility, speed and insight.

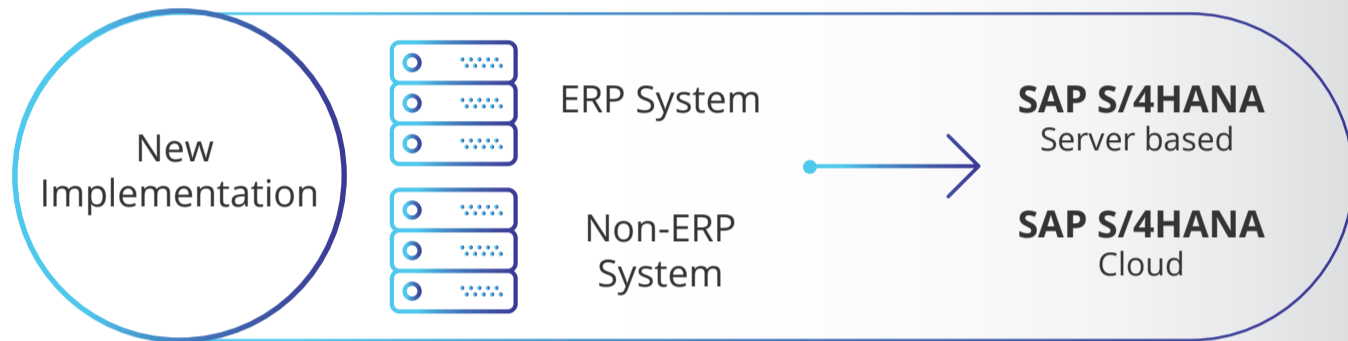

• SAP S/4HANA **Conversion** •

All the data used in the existing SAP system are converted into the **SAP S/4HANA** system based on servers.

System Conversion
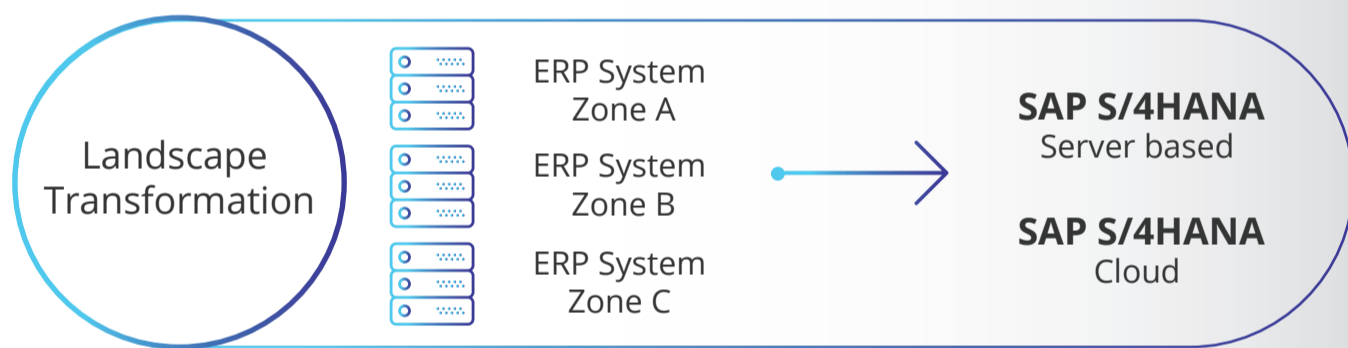

ERP System → **SAP S/4HANA** Server based

• New **Implementation** •

The existing system on the SAP or non-SAP system is entirely converted and migrated to the new **S/4HANA** platform. The conceptual design is recreated, and a new process design is made accordingly.
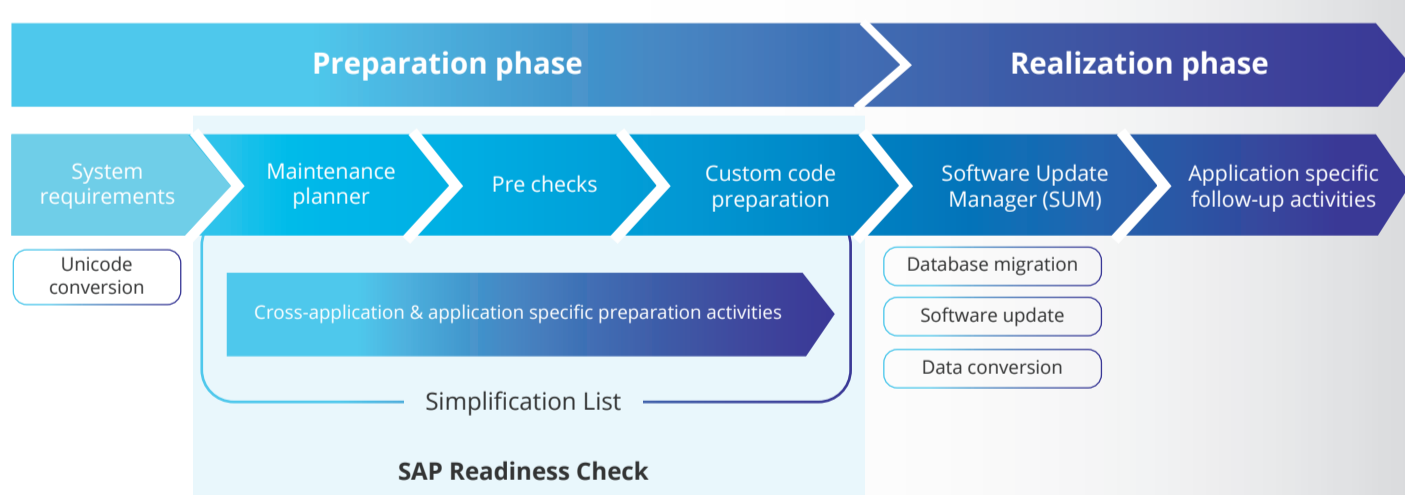

New Implementation

ERP System → **SAP S/4HANA** Server based

Non-ERP System → **SAP S/4HANA** Cloud

• Landscape **Transformation** •

The multiple ERP systems currently used are gathered under one roof and migrated to the **S/4HANA** platform.

Landscape Transformation

ERP System Zone A
ERP System Zone B
ERP System Zone C
→ **SAP S/4HANA** Server based
SAP S/4HANA Cloud

• **Technical** Phases •
